Create **YOUR** event
taking into account
ITS needs with the best
app of the events industry

Create your website

You can create a website
for your event in less than
1 hour, complete with content,
colours, languages, menus,
banners and images, all fully

customisable and editable from anywhere,
365 days a year.

Customised forms

Create as many forms as you need for
registering your participants and add fields
as needed. There are no limitations, creating
forms is fully customised.

Real and structured networking

You still haven't incorporated networking
into your events? Are you among those who
believe that networking is just a coffee break?
Is your method not working and you wonder
why? If you want to innovate and satisfy your
audience, this module will make it possible.

Tailored schedules for your participants

Innovate in your events and allow your
participants to choose the activities they
really want to attend. Give your participants
what they have been demanding for decades!

Participants management

The most complete module for processing
participants, created by events professionals.
It has never been easier to have your event
under control.

Travel and Accommodation

Managing travel and accommodation for
your participants has never been easier!
A complete module where you can manage
and unify your participants' travel and
accommodation details, send them their
tickets and keep everything under control.

Registration and accreditations

If you're someone who still ticks off lists,
you'll love this module! You can register
your participants by QR code, design and
print badges, print specific documentation
such as certificates, schedules, bills, diplomas
etc. Control access to specific activities and
much more.

Control and Invoicing

Keep the economic status of your event
under control; know your income and the
amounts due from your participants, create
invoices with the items you need and finally,
do something else with all the time you now
have to spare!

Configure your event

With TFE, nothing is left to chance: the
tool's versatility, flexibility and autonomy
makes it one of the best and most complete
applications on the market.

E-mail marketing

Promote your event and communicate from
anywhere! A module where you can program
your email marketing, create templates,
create automated submissions and see all the
details of the e-mail campaign at all times.

Real time statistics

All the information on what is happening
in your event in real time. You will see the
enrolment figures, the number of e-mails
sent, number of attendees, networking
meetings organised and more. Invaluable
information you can't afford to do without.

Payment Gateway

You can collect payment for event activities
with just a click, see payments received and
outstanding and link this information with
other TFE modules.

Announcements - Posters

Processing of announcements and posters at
a congress is one of the organiser's biggest
headaches. That is why we have developed
a very comfortable, agile and easy-to-handle
system for this important aspect of scientific
conferences.
